NUMBER 49

## Dr. J. S. Madill New President Elect

### NEWS NOTES

At Monday's Rotary meeting the new executive for the coming year was presented and unanimously accepted. They are: Dr. J. S. Madill, President; E. E. Jensen, Vice-President; Roi Stone, Secretary-Treasurer.

These three will select Committee Chairmen of all committees for presentation to the Club and the new slate will take over on July 1st, the beginning of the Rotary year.

The speaker at the meeting was Herb Wilde, who returned last week from three months stay in the north country, where he was driving truck on the Alaskan highway. Herb told some very interesting experiences. The population of the country is changing continually and Herb said the average turn over in population was 17 days. Many go in there who simply can't stand the cold and have to get out. Many go in seeking an El Dorado, and when they don't find it they move on. 60 and 65 below zero temperatures were common, but Herb says you don't notice it so much as people dress for the cold with eider down parkas and so on. He went to bed one night in 64 below zero weather in a tent with out heat and on a snow bank. He slipped into his feather sleeping bag on a mattress filled with air that kept him off the snow and had a fine sleep. They never stop their truck engines but leave them idling when they are not driving. Huge trucks with 50 and 75 ton loads are common and on the narrow roads truck driving has certainly had its hazards as two could barely pass and some times one or the other had to take the ditch. The road is now being rebuilt and widened with a 90 foot width, and six trucks can drive side by side on it, although he wouldn't advise anyone trying to pass at the same time! Herb's talk was greatly enjoyed by all.

### GIRLS GRADUATE AT VERMILION

A large class of 157 graduates completed their Basic Training course at Vermilion Training Centre this week end, and will be returned to their home districts in Western Canada. Sixty are from British Columbia, sixty from Saskatchewan and thirty-seven from Alberta—Military District No. 10 was not represented in this class.

Included in the Alberta group are: P. E. Adrienne A. Garner, Jean Lafferty, and Marie Piepgrass of Raymond.

### AGNES LOGAN GREEN

Gifted Canadian Pianist

Owen Nielson, brother of Mrs. Art Garner, is now operating the milk truck for Art which has been run for the past few weeks by Bruce Heggie.

The 145 Quorum of Seventy are having their annual social tonight in the 2nd Ward. A program will be followed by a dance and refreshments.

Primary Conference was held in both Raymond ward Sunday evening, with representatives of the Stake Board present at both wards. Each class had a number on the program, and in the larger classes individuals took part in various ways. Good congregations were present to enjoy the fine programs provided by the children.

P. O. Ewart of the Air Cadet movement was a Raymond visitor Monday having lunch with the Rotary Club at noon and meeting with Air Cadet committee in the early evening and with the local Squadron of the Cadets at night. His visit was enjoyable and beneficial and he gave the boys some valuable instructions in the regular parade at night.

A. N. MacDonald, Dairy Inspector, D.A. MacCullum, Dairy Commissioner, J. Dunkley of the University of Alberta Staff S. T. Wood, Dairy Commissioner of Agriculture and Mr. Johnson of Calgary were all visitors at the local Cheese Factory on Tuesday and were well satisfied with the set up as operating at present.

### Lion's Meeting

The regular meeting of the Raymond Lions Club was held in the Sugar Bowl Monday April 5th with Pres. Paul Moreland in the chair.

O' Canada was sung and prayer was offered by Leon Don E. Wilde.

Secretary Dean Nelson reported that "Leo's Night Out" was a financial success.

Lion Jack Vanderhilt announced that the Lions had concluded their collections for the Red Cross Society.

Secretary Nelson read a letter from the Dominion Government asking the support of the Club in the next Victory Loan drive.

Leon Joe McLean led the boys in community singing.

Chairman of the Program committee Jim Weaver asked Lion Bryant Henninger to give some of his experiences on his trip to Alaska.

Lion Herbert Wilde also related some of his experiences during his 3 month stay in the north. Many questions were asked by the members & much information was gained from the answers Herb gave.

The Club voiced its appreciation of the very fine co-operation of the people of the Town.

Lion Jack Kenny was appointed "Leo's Night Out."

In their recent entertainment to see the Vets about having a band that had gone to do their part in an Honor Roll made of the bit.

The meeting closed by singing the National Anthem.

## We Did It Before We'll Do It Again

### THE FOURTH VICTORY LOAN

Late this month Canadians will be given one of the toughest assignments of the to date—the task of raising by voluntary subscription one billion, one hundred million dollars to help pay the cost of war for 1943. The campaign opens on Monday, April 26th.

A few years ago a Canadian budget of a billion dollars was beyond all imagination. And, callous as we have become to talking in nine-ciphered figures, it will still be a big job to raise

that much money from the savings of some eleven million Canadians.

Considering the coming campaign from the angle of our own campaign, it means that a \$100 bond must be bought by every man, woman and child.

But there must be no talk of sacrifice in subscribing to this new Victory Loan. Setting aside money from our savings to loan it to our country at a generous rate of interest isn't sacrifice. From the standpoint both of the individual and of the nation, it's good business. —Brooks Bulletin.

## Girls Will Be Boys

(By Roy L. Smith in the Claresholm Local Press)

I have become firmly convinced of late that I belong to a superior sex. In fact, there seems to be no doubt about it. The women themselves admit it—by imitating us.

But the strange thing to me is the fact that women, instead of beginning on our virtues, have started out by imitating our vices.

I have done a little fishing—not much—just enough to know that one kind of bait will catch one kind of fish and another kind of bait will catch another kind of fish. As a general rule I can tell from the kind of bait the girl is using what kind of a poor fish she is angling for.

The facts are that a cigarette dripping from the lips of a girl has never yet attracted any man worth attracting.

The secret of a woman's power has always been in her womanliness, not her masculinity. I know of a girl who is an expert boxer, but I do not know of any man who wants to marry a trained sparring partner.

The Lord made the women beautiful and foolish. Beautiful so that the men would love them and foolish so that they could love the men.

The modern girl who thinks she can best gain her rights by stepping down from high ideals of womanhood is simply flattery, some ridicule behind her back and sure disappointment.

The thing about this gas of me, self-starting age is the fact that so many young women are ashamed of their best. They would rather be called good sports than good women.

We have complained against the double standard. I am opposed to it. But the only progress we have made in attaining a single standard has been the lowering of women's standards down toward that of the men.

Self respect is the finest virtue that any person can cultivate. The world will never rate us any higher than we rate ourselves.

We frequently hear girls complaining about the restrictions to the house a couple of days of the first part of the week but know of many conventions that interfere with a girl becoming womanly. I do know of some that have been developed for the purpose of safeguarding her modesty, protecting her from insults and making her fight for chastity easier.

Chivalry and courtesy are the finest compliments that good men ever pay to good women. The woman who attracts this sort of attention from any man is the one who is most a woman. The lowest gutter bum instinctively recognizes a womanly woman and summons all his remaining manhood to show her respect. The woman whose strongest appeal is her sex is certain to get the attention of men who have no other interest in her.

The woman who esteems her self common will be accepted by the community. The girl who gives her high favors to every man is held in high favor or by none of them. She who reserves her best for one man will be respected by all.

I overheard a young woman defending her drunkenness on the grounds that she was broad minded on the subject. I do not deny that any woman has the right to drink. But she also has the right to the rewards of drinking. If she has any doubt as to what these rewards are let her go down to the municipal court tomorrow and see the crowd of drunks that come up. Look into the faces of these wrecks who have won their rights by long and patient years of drinking.

One does not need to be broad to be deep. The Washington monument is narrow but lofty. I have the feeling that the modern girl is being swindled. She is trading modesty for vanity, chastity for sophistication, freedom for danger, womanliness for daring and elegance for cosmetics.

It is pathetic when girls will be boys. They fail as girls and make themselves ridiculous as boys.

Well, it won't be long until Easter. This is the latest Easter has been since sometime in the 1890's.

Willis Taylor has recently been transferred to a large army school at Atlanta, Ga. Willis is in the Army Medical Corps.

Dr. J. S. Madill was confined to the house a couple of days of the first part of the week but is around again now and at his work.

Green Hall of the Royal Canadian Navy was home on leave for a day or two, arriving Monday evening. He is being transferred from the west to the east coast and had a short stop over enroute.

## Raymond Boys Win Boxing Bouts in Lethbridge

### CANADA 1943

The publication is announced by the Dominion Bureau of Statistics of the 1943 edition of the Official Handbook "Canada."

Canada 1943 covers the present situation in the Dominion from Atlantic to Pacific, the weight of emphasis being placed on those aspect that are currently of most importance. So far as space permits, all phases of the country's economic or organization are dealt with and statisticians are brought up to the latest possible date. The text is accompanied by a wealth of illustrative matter that adds to the interest of the subjects treated.

The price of the publication is 25 cents per copy which charge covers merely the cost of the paper and actual press work. The special price concession granted, in the past to teachers, bona fide students and ministers of religion has been discontinued in view of the necessity for diverting as large a proportion as possible of Dominion funds to the War, and to the fact that, as far as possible, the sales policy of Government publications should be self-sustaining as regard printing materials used.

Application for copies should be made to the KING'S PRINTER, OTTAWA, and not to the Dominion Statistician.

Bert Hall and Mark Hicken left last week for the United States where they have employment in the state of Utah.

Reg. Cooper, Geo. Ralph and H. P. Allen were amongst those from here attending the boxing bouts in Lethbridge last Saturday night.

### FARM STORED WHEAT

Reports of infested wheat in granaries have been received from farmers in various districts of southern Alberta and other parts of Western Canada as well as some individual reports from the north and west of bushels of their wheat infested.

Entomologists urged farmers to pile into their stored wheat with a broom handle or long pole. If the pole does not slide down easily but is characterized by the probability is that the wheat is infested and needs immediate attention.

Generally, whenever wheat begins to spoil, the grain beetles make their appearance. These tiny brown beetles eat the embryo of the wheat.

Much wheat went into granaries last fall on the tough side. Entomologists explain the high moisture content gave rise to heating and the wheat became mouldy and caked.

Considerable infestation has also been noted in piles of wheat stored in the open. Many farmers dumped the wheat on Ontario U. E. Loyalist farm camp ground and moisture but has lived most of her life worked its way upward into the pile. More moisture, from rain ing nicely on the network, the and snow seeped through from the top.

Shovelling the wheat will aid in the abate of love. Miss Bradshaw's festered grain and avoid further great ambition is to be a radio engineer. She began her singing career on a dare. As a high school student at a dance she responded when the orchestra leader called for volunteers to sing.

They farmer who finds his wheat is infested should immediately turn over the matter to the entomologist's leader called for volunteers to sing. —Wheat Pool Budget.

Participating in the Boxing Card at Lethbridge Friday and Saturday nights of last week, Douglas Allen and Billy Laffer both won the finals in their class, Doug in the 118 lbs. Open and Billy in the 80 pound class.

Both fought Saturday night and Doug was matched with Jim Emery of Lethbridge again. These two boys have met repeatedly and they always stage an outstanding fight. Saturday's was no exception and spectators called it one of the best fights of the entire card. Doug's short left was a continual source of worry to his opponent during the entire fight. Quite a number from here attended the card and enjoyed it very much.

### CLARIFICATION OF FARM SLAUGHTERING REGULATIONS

A farmer who slaughters beef for his family use, may sell to his neighbors parts of the carcass not needed by himself provided the meat is used by the neighbors and not resold, explains A. W. Trickey, Calgary representative of the Wartime Prices and Trade Board. He goes on to say that authority must be obtained from the Food Administration before any beef can be sold, if the meat is to be resold. In other words no farmer is permitted to sell beef to such places as butcher shops, restaurants etc. If a beef ring has been in operation for some years this arrangement is permitted under the regulations, but the members of the ring must not sell the meat they receive. —Wheat Pool Budget.

Harold Card arrived home Saturday night and returned to training again Sunday night. He is at present in Calgary.

### OWEN BRADSHAW

Owen Bradshaw is the popular vocalist heard over CBK and Western Stations on the CBC Series "Tunes For Today" from Winnipeg on Fridays at 11:00 p.m. CDT (10:00 p.m. MDT). She comes of an old farming family but has lived most of her life in the West. In addition to singing nicely on the network, she works occasionally as a control room operator in one of Winnipeg's radio stations. This is considerably in the line of her ambition is to be a radio engineer. She began her singing career on a dare. As a high school student at a dance she responded when the orchestra leader called for volunteers to sing.

### OUR LOCAL CO-OP

Our local Co-operative, the side of its stockholders, and the hope of the district is steadily forging ahead. As spring advances milk deliveries are increasing, egg deliveries are mounting all the time, and the deliveries are getting too much for one grader. The Locker Storage department is well patronized, and with the coming of warmer weather it is expected that the remaining lockers will soon be cleaned up. The fact business is gradually increasing, new customers, as the variety of feeds and concentrates is almost unlimited, and

more and more feeders and farmers are buying special concentrates for their special needs.

All in all the outlook is encouraging. There is still, however, a lack of that community interest which spells success in large letters for enterprises of this sort. It is that spirit of all for one and one for all that we need. If our cheese factory succeeds it will make a prosperous and permanent community. It will furnish an income each week that will pay the grocery bills, pay the clothing bills, pay the coal, and the hundred and one incidentals that usually we say "charge it" and forget it, and when we get our bills we are sure the darned merchant is crooked because we know we never charged that much, and here are the figures, and you don't lie. You would be surprised to see the semi-monthly returns that are going to farmers and poultrymen. Not a fortune, and not all profit, but in the main they are side lines to the main business. A hundred good laying hens will lay about three times their cost

in feed each day. Four or five good cows will do about the same thing or even better. True there is work connected with it, and you have to be home to take care of them, and likely, if everyone went in for these things that the market may be flooded sometime. However, at present there is a demand for more and more milk, eggs, meat and so on. All in all, there is every encouragement for production for eggs and milk. The Factory gives us a sure and steady market, and while we are building up our own resources, we are also building up an enterprise that will stabilize our population and enrich the pockets of producers every week in the year. Get a share of the \$2,500 each month being paid out and get a share or two of Cheese Factory stock.

If you are one of the few who wonder if it is safe to sell your milk to the Factory, or one who is wondering whether a penny or two a day may not be made by selling somewhere else; why not take thought for a minute of your neighbors, your friends, your children and

your neighbor's children. We have a future to build. Local enterprises are the goal of every community, especially in rural areas like our own. Now that we have one started, and going good, let us see that it does not fail. Let us support with our produce if we are producers. If we consume and do not produce, let us give it a share of the money that we spend when quality and price are low. Only as Raymond grows is on a par with other institutions and prospers can we grow and prosper. If we call this our home we should work for its up building and betterment.

Armament 19:30-20:00 hrs

"It's for Bill"

... and when you buy a Victory Bond, to help Bill, and other boys on active service, you do something that will benefit you too. You save money. It's really a mistake to say that you "buy" a Victory Bond. You are not buying anything. You are saving money, and putting your savings where they will be absolutely safe, and where they earn money for you. (Each \$100.00 Victory Bond earns \$3.00 a year—3% interest.) You are likely producing more, and earning more. You can save more. You are not buying some things; you can't get them. You are buying less of many things—they're rationed. You can't help saving more. See to it that your savings are kept intact—earmarked for things you will need when the war ends. You will have to replace things that are worn out. You will want a lot of things. Money saved and invested in Victory Bonds will provide cash to pay for them.

### WHAT IS A VICTORY BOND?

A VICTORY BOND is the promise of the Dominion of Canada to repay in cash the full face value of the Bond at the time stipulated, with half-yearly interest at the rate of 3% per annum until maturity.

A Victory Bond is the safest investment in Canada. The entire resources of the Dominion stand behind it. Canada has been issuing bonds for 75 years, and has never failed to pay every dollar of principal and interest.

A Victory Bond is an asset more readily converted into cash than any other security.

You can buy Victory Bonds for cash in a lump sum, or you can arrange to pay for them in convenient instalments over a period of six months.

Your Victory Bond salesman will be glad to tell you full particulars.

Buy all the **VICTORY BONDS** you can

## Feeding Care of Brooder Chicks

The brooding period, that is, the first six to eight weeks of the chick's life is the most critical and requires constant attention to details of feeding and general management. Even the ideal conditions of sanitation, temperature prevail improper feeding may still bring about disaster during this period, says H. S. Gutteridge, Poultry Division, Central Experimental Farm, Ottawa. Under most conditions it will be most satisfactory to feed a prepared starter mash, but in wartime where some essential ingredients are difficult to obtain and substitution is necessary the commercial mixed mash is a more sure source of a balanced diet than a home-mixed mash where ingredients of unknown quality and vitamin content must often be used. In addition the actual quantity of feed consumed while the chicks are small is so little that it does not pay to attempt to save money by the use of inferior mashes during this period.

A high quality starter mash should be before the birds at all times and sufficient hoppers

used that the chicks do not have to compete for feeding space. It is important also that a liberal supply of fresh water in fountains of a type which the birds cannot contaminate be available. These fountains and the mash hoppers should be set on raised frames covered with one-half inch hardware cloth so that any water or feed which is spilled goes through the wire and cannot be picked up off the floor after being contaminated with droppings. At six to eight weeks of age, depending on how well the chicks have developed, a small quantity of scratch grain is fed increasing the amount slightly each day. Again, as a measure of sanitation, this grain should be sprinkled on top of the mash in the hoppers, or if the birds are outside, broadcast on the range as far as possible away from the house to avoid contaminated ground. By following carefully such a plan of feeding and feeding management, strong, thrifty chicks should result. — Wheat Pool Budget.

## NEWS NOTES

Milk production is increasing a little all the time and the receipts at the Cheese Factory are mounting all the time. Monday's deliveries totalled nearly 3,700 pounds.

Gordon Rober's, who enlisted two or three weeks ago and passed his trade tests in Calgary, has been sent to a trade school recently opened in Toronto. His parents were quite disappointed that he was unable to even get a short leave at home, but they are gratified that he was one of the two chosen from his class to go east to the trade school. Congratulations Gordon.

## Guard Your Gasoline Ration Book

KEEP IT ON YOUR PERSON • DO NOT LEAVE IT IN YOUR CAR

NOW that you have your 1943-1944 gasoline ration book, it is up to you to keep it at all times in a safe place. If it is lost, burned, or stolen, you will be deprived of coupons which will not be replaced. In this regard, the policy of the Oil Controller is as follows:

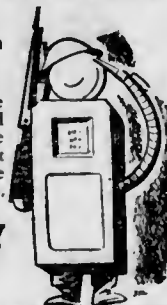

- If, through negligence, you lose your gasoline ration book before October 1, 1943, you may be allowed no more, and perhaps less, than half the coupons to which you would be entitled if you were making an original application.
- If, through negligence, you lose your ration book on or after October 1, 1943, you may be allowed no more, and perhaps less, than 25 per cent of the coupons to which you would be entitled if you were making an original application.

The new gasoline rationing system, effective on April 1, will be strictly enforced. Under its provisions, the motorist, as well as the service station attendant, is held responsible if any infractions occur. It is contrary to the orders of the Oil Controller:

- 1 To purchase gasoline with 1942-1943 coupons.
- 2 To purchase gasoline unless you have the correct category sticker affixed to your windshield.
- 3 To detach coupons from your own book. (The removal of the coupons is the duty of the attendant.)
- 4 To have in your possession a gasoline ration coupon not attached to, and forming a part of, a gasoline ration book.
- 5 To have in your possession a gasoline ration book other than the book issued in respect of a vehicle you own, or in respect of a vehicle driven by you with the full consent of the real owner.
- 6 To alter, deface, obliterate, or mutilate any gasoline ration book or coupon.

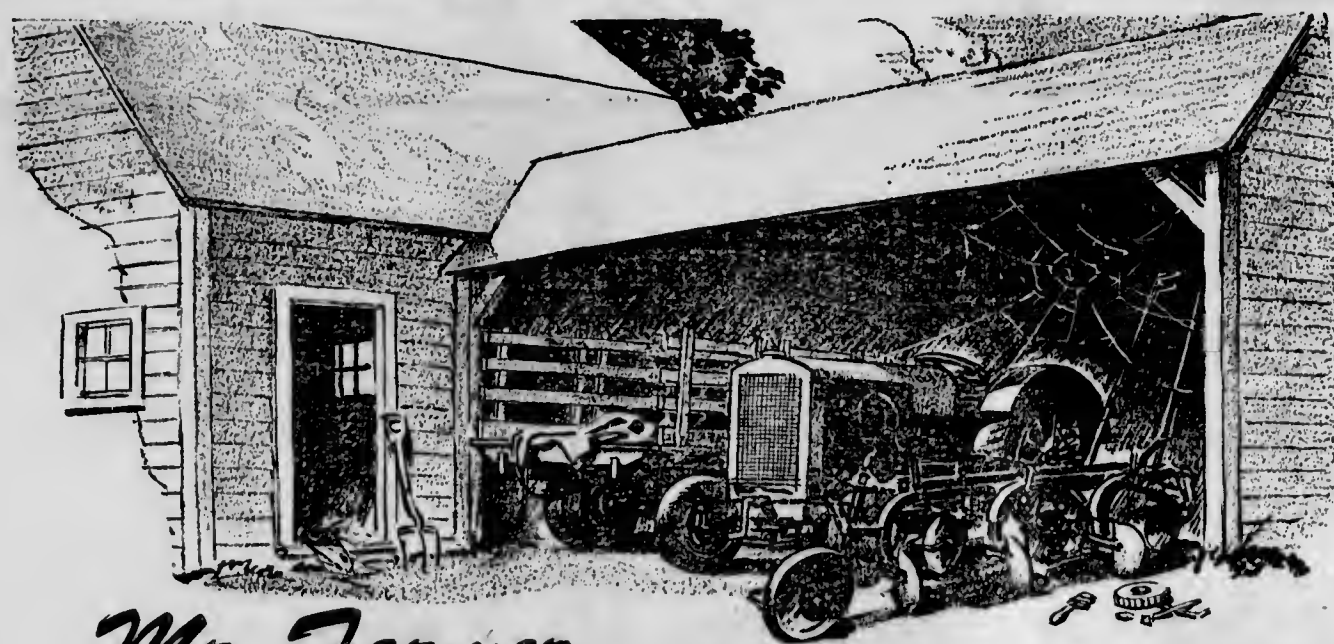

If you sell your motor vehicle, remember that before making delivery you must remove the windshield sticker or stickers. Remember also that after the sale is completed, you must mail to the nearest Regional Oil Control Office in your province the gasoline ration book or books issued for the vehicle.

THE DEPARTMENT OF MUNITIONS AND SUPPLY

Honourable C. D. HOWE, Minister

CANADA IS SHORT OF GASOLINE • USE YOUR COUPONS SPARINGLY

Mr. Farmer,

## YOU CAN'T STAY IN BUSINESS TODAY WITHOUT PROPER LUBRICATION!

THE right kind of lubrication is as necessary as the right kind of seed. For, poor lubrication, like poor seed, results in loss. So, in your own interest, be as careful in your choice of lubricants for your farm equipment as you are in the selection of the seed you sow.

Every McColl-Frontenac farm lubricant is especially designed for a particular job—to help keep farm equipment operating longer—more efficiently and at lower cost.

See the McColl-Frontenac Representative in your district, without delay. He will show you why you should use McColl-Frontenac farm lubricants exclusively.

Here are four that will help your farm machinery do a better job.

### TEXACO MARFAK

For Wheel-Bearings and Vital Friction Points.

This famous lubricant lasts longer and lubricates better under the toughest working conditions. It is self-sealing and keeps the working lubricant in where it is needed most, prolonging life of bearings and universal joints by keeping out rain, mud and dust.

### RED INDIAN MOTOR OIL and RED INDIAN AVIATION MOTOR OIL

Here are two great oils that will lengthen the life of any engine. They ensure full power and economy under all operating conditions. These finer oils combat acid corrosion, friction, waste and wear. They stand up under highest engine heat... they flow and lubricate the moment the engine starts.

### URSA X\*\* (CANADA)

The Perfect Motor Oil for Diesel and Heavy-Duty Gasoline Engines.

Highly resistant to the formation of gum, sludge and carbon, Ursa X\*\* (Canada) keeps rings, ring grooves, valves, screens and filters clean. Provides maximum bearing protection. Ensures full power and lower fuel consumption.

### FREE

Here's a handy, everyday reference book. It tells you how to make an economical farm workshop, how to properly hitch implements to tractor, and a hundred other ways to save time, money and labour 'round the farm. Write today for your free copy to McColl-Frontenac Oil Company Limited, Montreal, Toronto or Calgary.

## MAIN DRIVING WHEELS OF CANADA'S WAR EFFORT

**HURRYING** wheels, thundering wheels. Wheels that have made it possible for Canada to grow in strength.

Today those wheels—the driving wheels of Canada's railways—are setting the pace for the war effort. They haul raw materials to humming war industries and rush away the finished tools of battle. They move food and fuel for the home front and the fighting front. They speed civilians on essential business, hasten troops to camps, embarkation points and on leave.

It's Canada's big war job. A job that only railway wheels can do. A job in which an army of 150,000

railway workers, men and women, is in the fight for Canada... shop crews and train crews, yard workers, section hands, telegraphers, signal men and office workers, a multitude of men and women in a multitude of jobs. They are making the giant wheels turn faster and faster.

From coast to coast in Canada, we—your railways—are rolling in the service of freedom, and our lines to and in the United States have linked the war efforts of two great sister nations.

The railway wheels are driving, in war as in peace, for Canada.

## Canada's FARMS... BRITAIN'S TABLE

In the United Kingdom, millions of brave men, women and children look to Canada's farms for their daily food.

Canadian farmers, who have never failed in times of peace to produce and export the needed table supplies, now are intensifying their efforts to feed the people and armies of Britain.

On Canada's broad acres farmers are

fighting a great battle of production so that Britain shall not lack the grains, meats, fruits, vegetables and dairy products essential to victory.

The Bank of Montreal's complete wartime banking service is extended to Canada's farmers through hundreds of branches from coast to coast. Our export department is daily financing shipments of foodstuffs for Britain.
